

Long-Term Support to Key and Vulnerable Population Groups and Networks

Contact Details

Twelve partners work to strengthen the capacity of key and vulnerable population groups and networks to support meaningful engagement of their constituencies in Global Fund and related national processes. Partners work towards two main outcomes:

1. Communities most affected by HIV, TB and malaria generate and use data to inform advocacy and decision-making.
2. Communities most affected by HIV, TB and malaria have capacity to mobilize and hold their representatives and decision-makers accountable.

Partners work in the following countries:
