

Overview of Technical Assistance Providers

Date published: January 2021

Date updated: January 2024

The Community Engagement Strategic Initiative (CE SI) has pre-qualified nineteen (19) civil society and key population networks and organizations as technical assistance providers for the 2024-2026 implementation period. These organizations were selected through an open and competitive tender process, to ensure providers have a strong track record and relevant expertise in relation to gender, human rights, equity, key populations and community systems and responses. Technical assistance providers will be selected in line with the specific requirements of each technical assistance request and based on their technical and regional expertise, language of delivery, availability, ability to identify national and regional community experts and to contribute to their skills transfer, past performance and value for money.

Technical Assistance Provider	Technical Area											Region
	Addressing gender, age and human rights related barriers in relation to access to and retention in HIV, TB and malaria services.	Engagement of women and girls, particularly AGYW, in sexual and reproductive health policies and programs, particularly within the context of HIV prevention, treatment and care.	Engagement of young people, including adolescents, from HIV, TB and malaria key affected populations.	Engagement of key and vulnerable populations in HIV prevention, treatment, care and support and related advocacy.	Engagement of communities most affected by malaria in malaria control and access to care and support and related advocacy.	Engagement of TB survivors and communities most affected by TB in TB prevention, treatment, care and support and related advocacy.	Sustainability, transition and related processes (i.e. health financing, budget accountability and advocacy, social dialogue and social contracting).	Community systems strengthening as part of broader interventions to strengthen resilient and sustainable systems for health and community responses to HIV, TB and malaria.	Community-led monitoring and feedback mechanisms for social accountability and to improve the responsiveness, effectiveness and impact of programs and services.	Costing of community priority interventions, including mentorship on community costing guidance and tools and direct costing support.	Ensuring linkage to care and engagement of vulnerable and marginalized populations, including IDPs, refugees and migrants, in challenging operating environments.	Regional focus ¹
